Examiner Interview A

Dear Examiner Nickerson,

My apologies for sending this to you via email. I did not have your personal fax number and I didn't want to send this to the main fax number because I do not want it placed in the public record. Please let me know if you think you will not have enough time to prepare for the interview and I will re-schedule. Otherwise, I will talk to you at 2PM today.

Thank you again for agreeing to interview this case.

My best,
Kellan Ponikiewicz

VIA EMAIL

Examiner Jeffrey L. Nickerson
United States Patent and Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

RE: U.S. Patent Application No.: 10/711,591
Title: *Systems and Methods for Virtual Host Name Roaming*
Filing Date: September 27, 2004
First Named Inventor: Michael Burr
Attorney Docket No.: 2006579-0272 (CTX-093DV)

Dear Examiner Nickerson:

Thank you for agreeing to a telephone interview today, Wednesday, September 23 at 2:00 PM EST to discuss the outstanding office action for the above-referenced patent application. In preparation for the phone call, we provide the following discussion points as an agenda:

Agenda

1. Discussion of proposed amendments.
2. Discussion of Arguments Set Forth in Rejection Made Under 35 USC § 112.
3. Discussion of Microsoft02, ISA01 and LinuxQuestions

Attached is a proposed claim amendment for your review. Please contact me with any questions or concerns you may have.

Best Regards,

Kellan D. Ponikiewicz
Registration Number: 59,701

CONFIDENTIAL FOR DISCUSSION PURPOSES ONLY DO NOT PLACE IN THE PUBLIC RECORD

Proposed Claim Amendments

1. (Currently amended) A method for providing a uniform network address, for a user accessing a computer on a network, independent of the computer the user is accessing, the method comprising:

(a) obtaining a plurality of virtual host names, each of the plurality of virtual host names comprising a host name uniquely identifying a user from a plurality of users;

(b) assigning, from the plurality of virtual host names, a first virtual host name to a first user accessing the network via a first computer to establish a first user session, the first computer having a computer host name and a computer internet protocol address to connect to the network;

(c) assigning, from the plurality of virtual host names, a second virtual host name, different from the first virtual host name, to a second user accessing the network via the first computer to establish a second user session, the second user accessing the network one of either subsequent to the first user session and concurrent with the first user session;

(d) using the first virtual host name of the first user with a first internet protocol address assigned to the first user for network communications of the first user, the first internet protocol address communicated via the first computer; and

(e) using the second virtual host name of the second user with a second internet protocol address assigned to the second user for network communications of the second user, the second internet protocol address communicated via the first computer.
